CAREER OBJECTIVE

Information Science and Engineering undergraduate with hands-on experience contributing to enterprise software projects and a strong foundation in problem-solving and software engineering practices. Seeking to contribute as an Associate Software Engineer by delivering reliable solutions, taking ownership of assigned work, and continuously learning through collaboration and feedback. Eager to grow into an independent engineer while creating meaningful value for the team and its products.

SKILLS

Programming	C#, C++, C, Python, JavaScript, SQL
Software Engineering	Object-Oriented Programming, Data Structures & Algorithms, SDLC, Debugging, Testing, Problem Solving, Modular Application Development
Backend & APIs	.NET, .NET WinForms, Node.js, Express.js, REST APIs, API Integration
Databases	SQL, MongoDB, CRUD Operations, Data Validation, Database-Driven Application Development
Application Development	Authentication, Role-Based Access Control (RBAC), User Management, Permission Management, Audit Logging
Development Tools	Git, GitHub, Visual Studio, VS Code
Web Development	React.js, HTML5, CSS3
AI/ML	OpenCV, YOLO, TensorFlow, Langflow, IBM Granite
Professional Skills	Communication, Team Collaboration, Adaptability, Problem Solving, Ownership, Accountability, Willingness to Learn

INTERNSHIPS

C# AND .NET DEVELOPER INTERN

Saatvik Solutions, Bengaluru

2026 – Present

Enterprise Software Development

- Develop and maintain enterprise applications using **C#, .NET WinForms, and MongoDB**.
- Implement **user management and role-based access control** while contributing to testing, debugging, deployment, and production support.
- Collaborate with developers on feature integration, issue resolution, application maintenance, and software enhancements.

PRODUCT MANAGEMENT INTERN

Yuvamytr, Bengaluru

2024 – 2026

Web Application Development

- Develop and enhance web applications using **React.js, JavaScript, Node.js, and MongoDB**.
- Contribute to **RESTful API integration**, backend development, testing, and debugging.
- Collaborate with cross-functional teams on requirements, feature development, and application improvements.

PROJECTS

Enterprise Pharmaceutical Manufacturing Management System

C# / .NET WinForms / MongoDB

- Developed an **enterprise desktop application** for pharmaceutical manufacturing operations using **C#, .NET WinForms**, and **MongoDB**.
- Designed configurable **Role-Based Access Control (RBAC)** for roles, permissions, and feature-level access management.
- Developed a comprehensive **User Management module** supporting user creation, modification, activation/deactivation, archival, password management, and role assignment.
- Implemented authentication workflows, input validation, audit logging, and modular application architecture while collaborating through Git-based development, testing, and maintenance.

LIC Jeevan Shanthi Website

React.js / Node.js / Express.js / MongoDB / REST APIs

- Developed a full-stack insurance management application using **React.js, Node.js, Express.js**, and **MongoDB**.
- Designed and integrated **RESTful APIs** for communication between frontend components and backend services.
- Implemented authentication, customer management, and policy-related business workflows.

AI-Powered Agricultural Risk Prediction System

Python / Langflow / IBM Granite

- Developed an AI-powered agricultural advisory application using **Python, Langflow**, and **IBM Granite**.
- Built workflows for analyzing crop and environmental data to identify potential pest and disease risks and generate recommendations.
- Implemented agentic AI workflows and prompt engineering to integrate intelligent capabilities into a practical software application.

EDUCATION

Bachelor of Engineering – Information Science and Engineering

Amruta Institute of Engineering and Management Sciences

2023 – 2027

CGPA: 8.75/10.0 (Till 6th Semester)

Pre-University Education

Narayana PU College

2021 – 2023

Percentage: 85%

ACHIEVEMENTS

- Certifications:** IBM SkillsBuild – Enterprise Design Practitioner; Full Stack Development (MERN Stack) – Yuvamytr; Programming in Java – NPTEL; IBM Cloud and Langflow – EduNet Foundation; Advanced Python – Object-Oriented Programming.
- Leadership:** IQAC Student Coordinator at Amruta Institute of Engineering and Management Sciences; organized the Smart India Hackathon Internal Hackathon and NEXORA-2K26 National Level Hackathon.
- Technical Activities:** Participated in IBM SkillsBuild Project Exhibition, Smart India Hackathon, Electrolyton, and Prathira technical events.
